	C18-A. WIRELESS INTERCONNECTION SERVICE	(N)
18.5 0	DBLIGATIONS OF THE CUSTOMER	
18.5.1	SUPERVISORY SIGNALING	
	The customer's facilities shall provide the necessary on-hook, off-hook, answer and disconnect supervision.	
18.5.2	TRUNK MEASUREMENT REPORTS	
	With the agreement of the customer; trunk group data in the form of usage in CCS, pegcount and overflow for its end of all access trunk groups, where technologically feasible, will be made available to the Utility. These data will be used to monitor trunk group utilization and service performance and will be based on previously arranged intervals and format.	

18.5.3 DESIGN OF WIRELESS INTERCONNECTION SERVICES

When a customer orders Wireless Interconnection, it is the customer's responsibility to assure that sufficient access services have been ordered to handle its traffic.

18.6	RATE REGULATIONS
	This section contains the specific regulations governing the rate and charges that apply for Wireless Interconnection Service.
18.6.1	DESCRIPTION AND APPLICATION OF RATES AND CHARGES
	There are three types of rates and charges that apply to Wireless Interconnection Service.
Α.	MONTHLY RATES
	Monthly rates are recurring and apply each month or fraction thereof that a specific rate element is provided. For billing purposes, each month is considered to have 30 days.
В.	USAGE RATES

Usage rates are rates that apply only when a specific rate element is

used. These are applied on a per access minute or per call basis. Access minute charges are accumulated over a monthly period.

(N)

- 18.6 RATE REGULATIONS (Cont'd)
- 18.6.1 DESCRIPTION AND APPLICATION OF RATES AND CHARGES (Cont'd)
 - C. NONRECURRING CHARGES

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for Wireless Interconnection Service are installation of service and service rearrangements.

1. Installation of Serivce

Nonrecurring charges apply to each Wireless Interconnection Service installed (i.e., per trunk). The nonrecurring charges for Type 2A trunks are from section C6.8.1(B)(2) preceding while Type 1 and 2B are from Section A3 or A5 preceding.

Nonrecurring charges apply to each Wireless Tandem Transport installed (i.e., per end office). The nonrecurring charges are described in this section.

2. Service Rearrangements

All changes to existing services other than changes involving administrative activities will be treated as a discontinuance of the existing service and an installation of a new service. The nonrecurring charge will apply for this work activity. Moves that change the physical location of the point of termination are described and charged for as set forth in C6.7.7 preceding.

(N)

18.6 RATE REGULATIONS (Cont'd)

18.6.1 DESCRIPTION AND APPLICATION OF RATES AND CHARGES (Cont'd)

If, due to technical limitations of the Utility, a customer could not combine its traffic with other Wireless Interconnection Trunks, no charge shall apply to combine these trunk groups when it becomes technically possible.

Administrative changes will be made without charge to the customer. Administrative changes are as follows:

- -change of customer name,
- -change of customer or customer's End User premises address when the change of address is not a result of a physical relocation of equipment,
- -change of in billing date (name, address, or contact name or telephone number),
- -change of agency authorization,
- -change of customer circuit identification,
- -change of billing account number,
- -change of customer test line number,
- -change of customer or customer's End User contact name or telephone number, and
- -change of jurisdiction

For additions, changes or modifications to optional features that do not have their own separate nonrecurring charges, a charge equal to one half the nonrecurring (i.e., installation) charge will apply. When an optional feature is not required on each transmission path, but rather for an entire transmission path group only one such charge will apply (i.e., it will not apply per transmission path).

18.6 RATE REGULATIONS (Cont'd)

18.6.1 DESCRIPTION AND APPLICATION OF RATES AND CHARGES (Cont'd)

D. APPLICATION OF RATES

The specific application of these rates for a specific customer is dependent upon the type of Wireless Interconnection Service provided.

The rate applied for Type 2A Wireless Interconnection Service is a per mobile-to-land access minute rate.

The rates applied for Type 1 and Type 2B Wireless Interconnection Service are a monthly per trunk rate, which can be flat or measured, and a facility charge applied per trunk.

All types of Wireless Interconnection Service have a nonrecuuring charge applied per trunk.

E. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES

The specific application of payment arrangements and credit allowances are in Section C2A.2.4 preceding.

18.6 RATE REGULATIONS

18.6.2 MEASURING WIRELESS INTERCONNECTION MINUTES

Wireless Interconnection Service is measured using switched access methods described in section C6.7.8 preceding. The mobile-to-land call is measured from the time the off-hook supervisory signal is received from the end office when the called customer answers until the access tandem receives an on-hook supervisory signal from either the terminating end office, indicating the terminating End User has disconnected, or the CMC's point of termination, whichever is recognized first by the access tandem switch.

In the event the customer message detail is not available because the Utility lost or damaged tapes or incurred recording system outages, the Utility will estimate the value of lost customer access minutes of use based on previously known values.

Where terminating measurement capability does not exist for Type 2A Wireless Interconnection Service the number of access minutes will be derived from jointly agreed customer or utility data. If data is not available, assumed access minutes as set for in C6.7.8 preceding will be used.

18.9 DIRECT-IN-DIALING TO CMC POT

A. REGULATIONS

- 1. Direct-in-Dialing (DID) service permits calls incoming to a CMC MTSO over Type 2B trunk connections. DID service is provided subject to the availability of facilities and may be furnished from the central office which regularly serves the area in which the customer is located or from a foreign central office equipped to provide DID service subject to the appropriate intra/interexchange facility charges.
- 2. Rates are in addition to the rates shown elsewhere in the tariffs for the services with which this offering is associated (e.g. trunk-line rate and facility charge).
- 3. One primary listing will be furnished without charge for each separate trunk group. Additional listings can be obtained as specified in Tariff P.S.C.N. A5.
- 4. The CMC shall be responsible for providing interception of calls to vacant and non-working DID numbers by means of attendant intercept or recorded announcement service.
- 5. DID numbers are available in minimum groups of 100. Additional groups of 100 may be reserved for future use. The Utility does not guarantee to provide reserved numbers arranged in a consecutive manner. The Utility will be responsible for interception and administration of these numbers.
